DOMINUS·3

Smart security system

Dominus3

For **more than 20 years,** Dominus systems secure facilities with highest security requirements.
These systems can be found in state institutions, banks and prisons in both Czech Republic and Slovakia.

Dominus3 integrates longstanding security experience and transforms it into its key features - **modern design, ergonomics and ease of installation.**

Dominus3 offers **maximum security** for all system sizes. Whether it is one room or the whole building complex.

Complex security solution

Intruder detection

Recognition of unauthorized access to specific areas. Timely signaling **eliminates** potential **damage.**

Access control

Securing limited access to specific areas based on defined permissions. Dominus3 enables an authorized user to open doors, pass through a barrier or a turnstile.

System integration

Connection of major security platforms with **inteligent** building management systems and integration software.
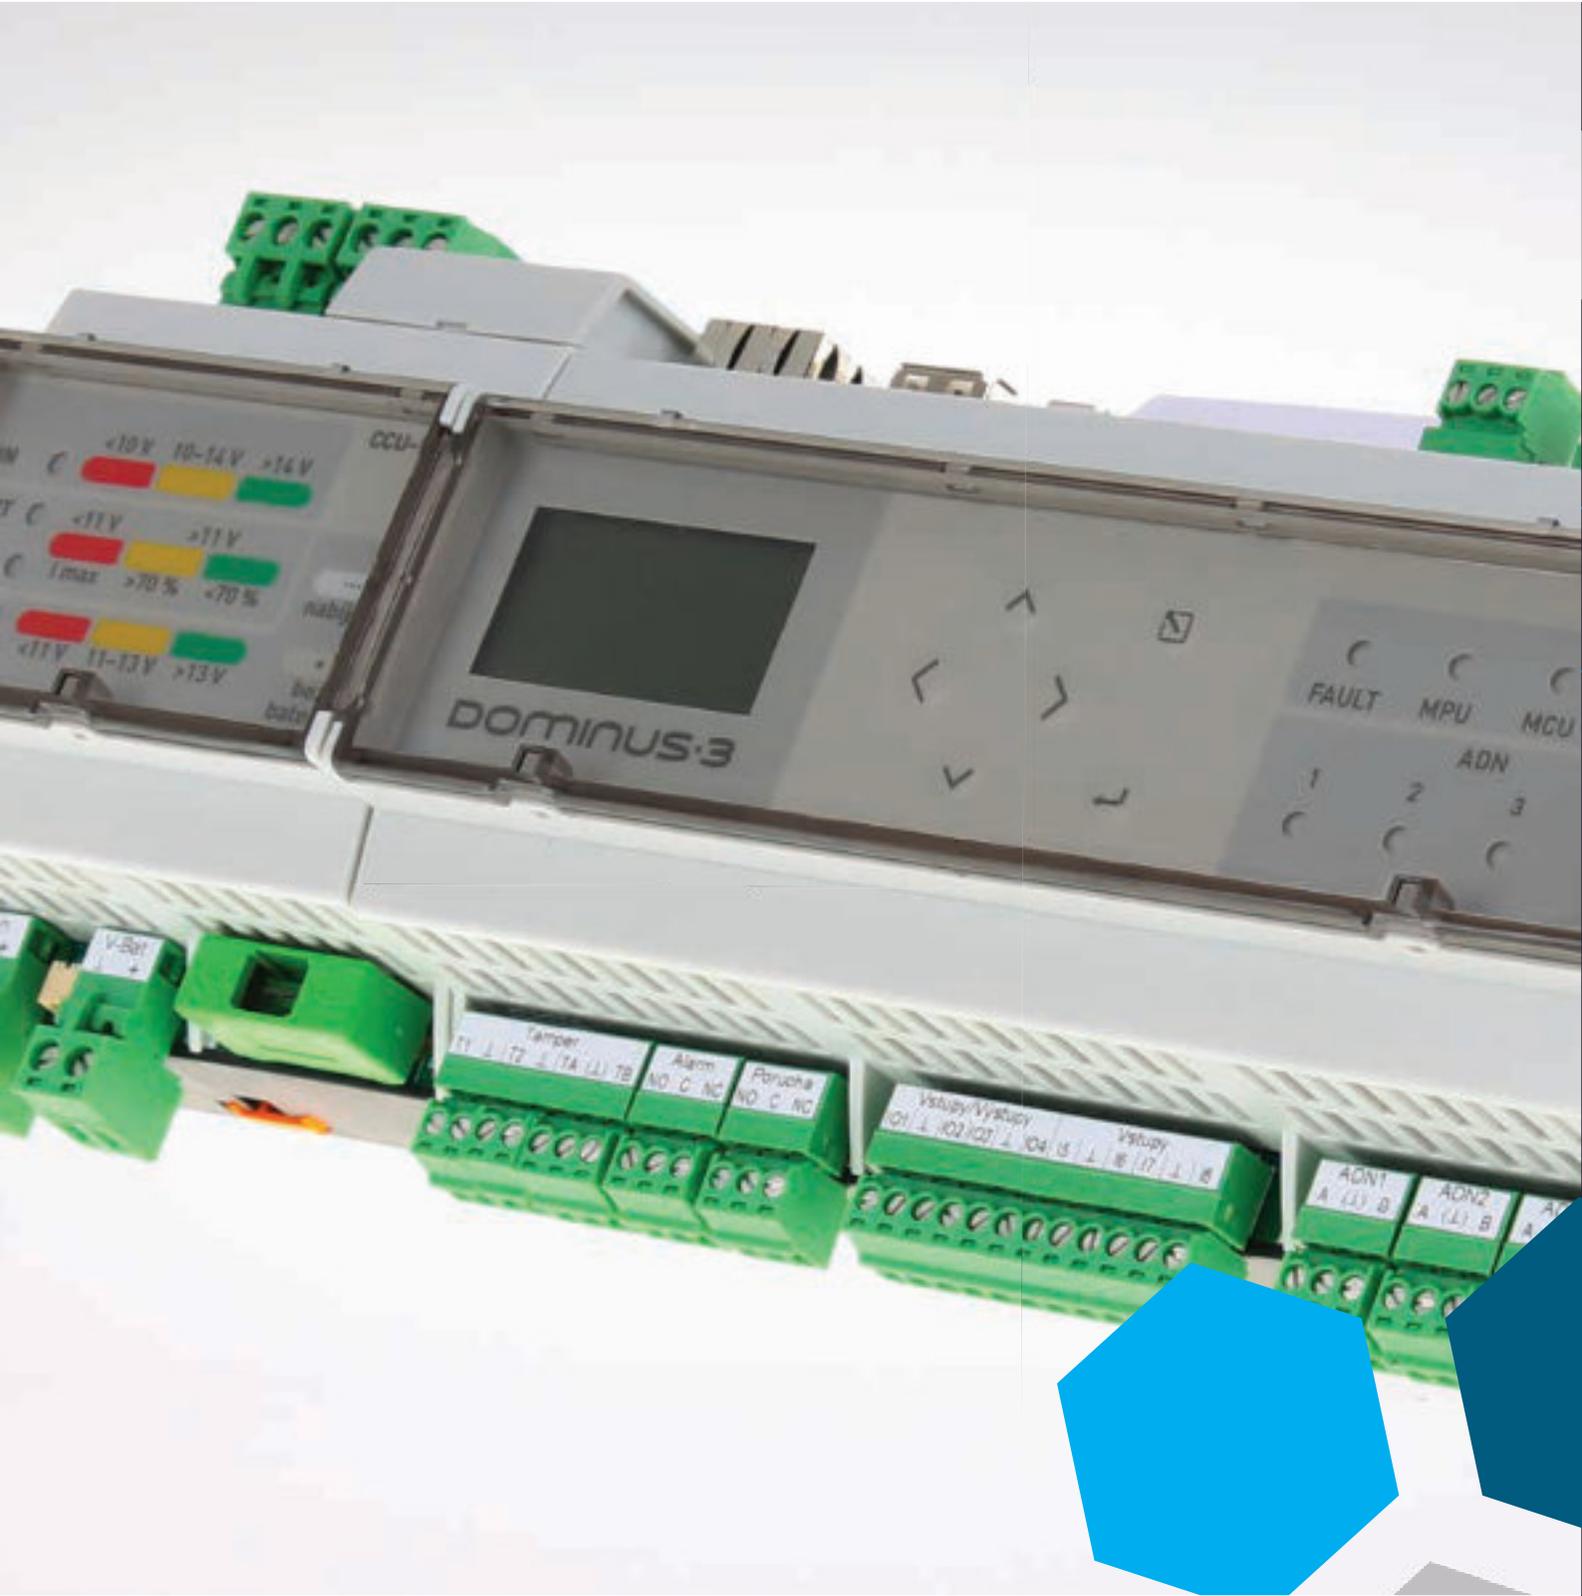

Design is important

Design

Control panel is usually located near the entrance and is therefore in the spotlight of all visitors. We realize the importance of design in **modern, technologically** sophisticated buildings. That is why we designed panel that is not only functional, but also offers **timeless look,** in black and white.

DID YOU KNOW, that Dominus3 Control panel is equipped with selective backlighting of buttons?

This makes system control completely intuitive.

Size without compromise

Size

Dominus3 is, in its essence, a **modular solution.** It does not matter, whether you aim to secure a residential object, bank or an international airport. Size does not matter. Dominus3 grows with your requirements.
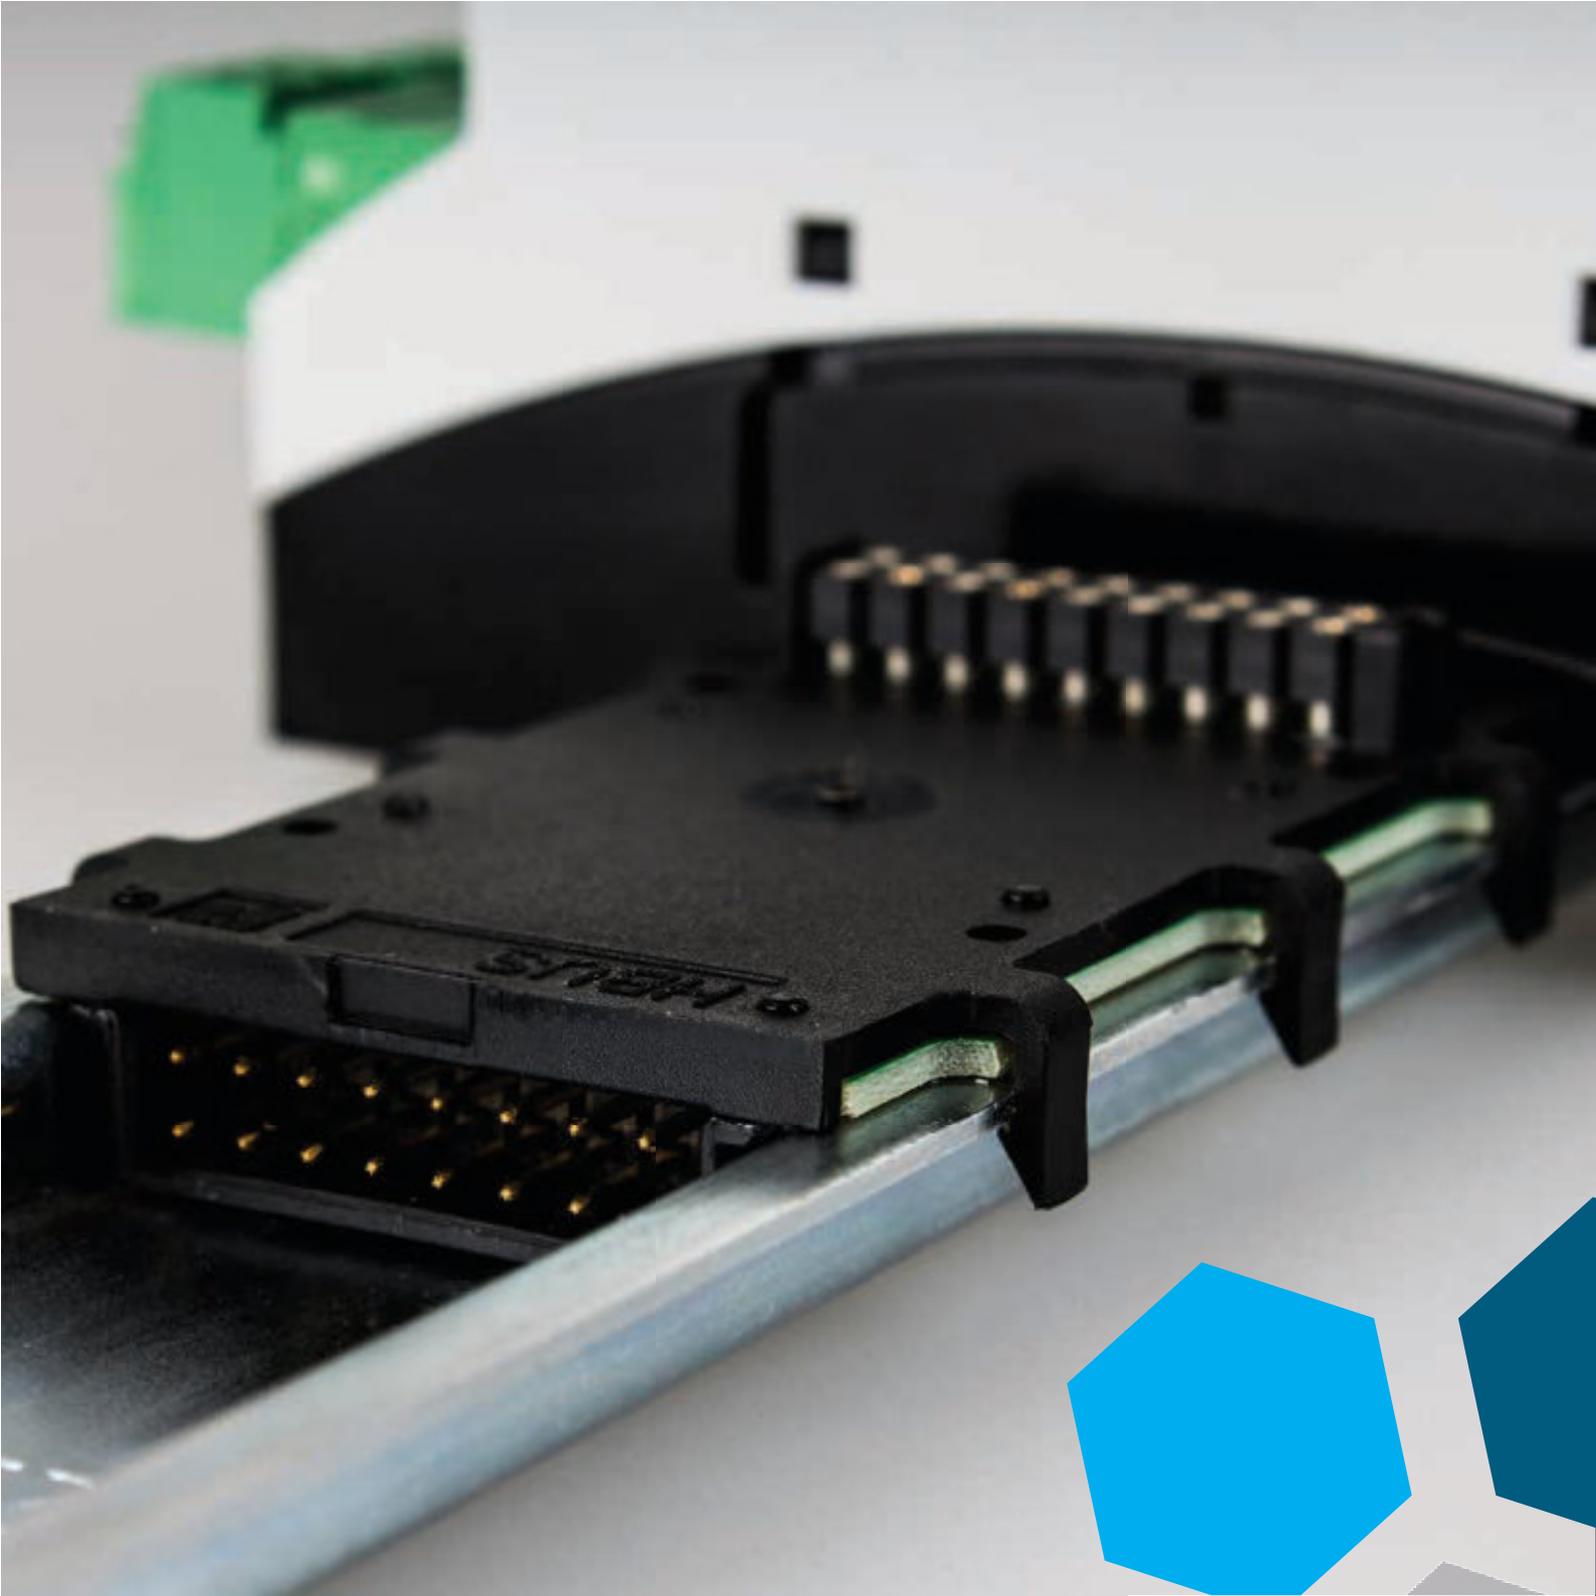

> **DID YOU KNOW,** that Dominus3 can handle 10,000 detectors, 2,000 doors and more than 50,000 users?
>
> All this at the drop of a hat.

Security at the highest level

Security

Dominus3 comes up with **encrypted bus communication,** thus shifting security limits to the next level. This high-tech solution is not only for military facilites, prisons or banks. Its **flexibility** makes it suitable for securing any commercial object.

DID YOU KNOW, that system Dominus3 is certified with highest intruder detection and access control standards?

Simplicity of installation

Simplicity

Dominus3 can handle thousands of address modules at once. One would expect that with this size comes complexity. However, that is not true.

Intuitive connection, automatic module recognition, predefined module settings and remote control will definitely **save your time.**

DID YOU KNOW, that Dominus3 uses patented DIN rail with integrated bus (H-BUS)?

The aim is to eliminate installation mistakes and simplify the overall process.
